

A W EDWARDS

POLICY

ENVIRONMENTAL POLICY

The diverse range of construction projects undertaken by A W Edwards since it was founded in 1921, has enabled the company to develop a comprehensive understanding of how it's activities can potentially impact on the environment.

As a responsible corporate entity A W Edwards has had considerable success in eliminating or minimising their environmental impacts while continuing to meet the expectations of its Clients. This has been possible by balancing commercial objectives with protection of the environment.

We have developed this policy to serve as a statement of our commitment to continue to protect the environment while conducting our activities.

To carry out this commitment, we will -

- As a minimum, ensure that our operations and our discharges to air, water and land comply with all regulatory requirements, guidelines and Codes of Practice,
- Continuously improve our environmental management system to enhance environmental performance where there is an opportunity to do so,
- Implement a structured management system to provide a framework to successfully develop, implement and monitor our environmental management programs,
- Ensure environmental protection is considered during the planning and design stage of new construction projects,
- Ensure appropriate pollution and waste management controls are implemented as a construction site is being established to effectively avoid or minimise pollution, and
- Regularly monitor the effectiveness of pollution controls throughout the entire construction period.
- Ensure our employees whose activities can potentially impact on the environment understand their responsibilities, and are capable of conducting their activities consistent with corporate environmental expectations,
- Expect our contractors and suppliers to meet the same environmental standards we have set for ourselves,
- Conduct open, honest and responsive communications with the community and government groups regarding our environmental management practices.
